a/ Total labor force by place of residence, including workers involved in trade disputes. Employment includes self-employed, unpaid family, and domestic workers.

b/ Range as shown is at the 90% level of confidence.

NOTE: These labor force data are supplied by the U.S. Department of Labor.

HIGHLIGHTS California's seasonally adjusted unemployment rate for August was 7.3 percent, down from the 7.6 percent in July. A year ago, in August, the rate was 5.5 percent. During August in California, seasonally adjusted employment increased by 187,000 over the month while unemployment decreased by 27,000. The number of job losers increased from 582,300 in July to 594,400 in August. The number of job leavers decreased by 31,200 during the month. The national civilian seasonally adjusted unemployment rate for August was 6.8 percent, the same as in July.

Total nonagricultural wage and salary employment, not seasonally adjusted, decreased by 8,600 from 12,775,100 in July to 12,766,500 in August. A loss of 40,300 jobs occurred in the government sector; this decrease was largely in the local education component, although it was less than seasonally expected. The largest increase in employment was in the manufacturing sector with a gain of 16,000 jobs; an increase of 19,100 in nondurable goods helped offset a 3,100 decrease in durable goods. Most of the nondurable goods employment occurred in the food processing industries, a typical seasonal increase. Other major sectors that registered increases were services with 6,200 additional jobs; construction with 5,300; wholesale and retail trade with 3,200; and finance, insurance, and real estate with 1,000. After adjusting August's data for seasonal variation, decreases were recorded in all major sectors except government, transportation and public utilities, and mining. Since August 1990, total nonagricultural wage and salary employment, not seasonally adjusted, has decreased by 81,800, a 0.6 percent drop over the year. During July, average weekly earnings and average weekly hours worked in manufacturing decreased to $478 and 40.1, respectively.

*Because of a relatively small sample, the monthly estimates for data in Table 2 do not always appear to reflect real labor market conditions. Therefore, these figures are a three-month moving average instead of monthly data. For example, July's data are an average of May, June, and July. August's data are an average of June, July, and August.

Prepared in cooperation with the Bureau of Labor Statistics and the Employment and Training Administration of the U.S. Department of Labor by the Labor Market Information Division, Guides and Economic Research Group, P.O. Box 826880, Sacramento CA 94280-0001, (916) 427-4660.

NOTE

Employment, average hours, and average earnings estimates for the current month are preliminary and subject to revision. These data are also revised annually, in February, to reflect benchmark changes.

FOOTNOTES TO TABLES

A. Does not include employers, own-account workers, unpaid family workers, domestic servants and agricultural workers. Figures for the current month are preliminary and are subject to revision.

B. Does not include force-account and government construction workers.

C. Includes all civilian employees of Federal, State and local governments regardless of the activity in which the employee is engaged.

D. Includes all employees at the city and county of San Francisco.

E. Average hours and earnings are based upon data for full-time and part-time production and related workers in manufacturing and mineral extraction industries, construction workers in construction and nonsupervisory employees and working supervisors in other industries. Average gross weekly and hourly earnings include overtime pay and premium wages for late-shift work. Attention is directed to the fact that these are not wage rates but are averages of the gross earnings.
